

INSTALLATION INSTRUCTIONS

TACO[®]
M A R I N E

SEAT SLIDE

M20-0225, M20-0226, M20-0227, M20-0228

TOOLS REQUIRED:

- Safety glasses
- Electric drill
- 5/16" drill bit
- Tape measure
- Pencil or nonpermanent marker
- Adjustable, box or open end wrenches
- (6) 1/4" - 20 hex head bolts (length determined by box wall thickness)
- (6) 1/4" - 20 nuts
- (6) 1/4" flat washers
- (6) 1/4" lock washers

Always check below the surface that that you are drilling into for electrical wires, tanks, hoses or anything else that could be damaged by your drill bit or screws.

MOUNTING INSTRUCTIONS

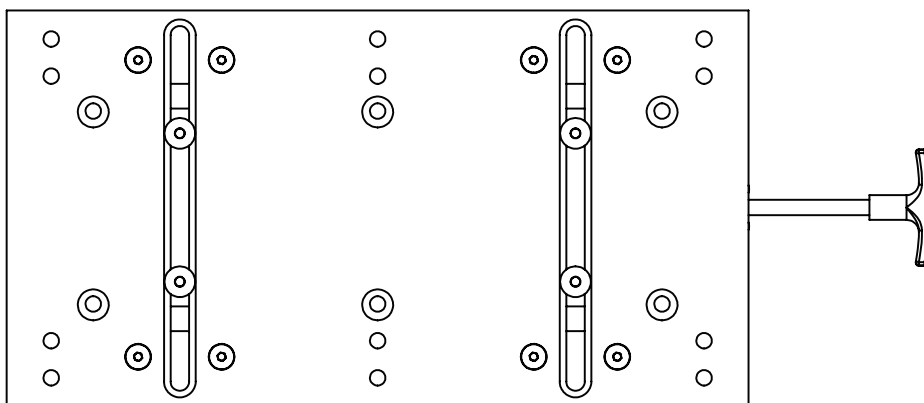

- 1) Clean the mounting surface of the box and check to assure that it is structurally sound.
- 2) Position the slide in the location desired, making sure that you have proper clearance around your seat.
NOTE: The slide can be attached to the seat while installing.
- 3) Once the location has been determined, use the slide base as a template to mark the (6) mounting holes on the box.
- 4) Drill (6) 5/16" Dia., mounting holes in the box and clean off any fiberglass debris.
- 5) Return slide and seat to the box and align with drilled holes. Check that the slide handle is on the side of the seat that you prefer (port or starboard).
- 6) Mount using 6 each 1/4" - 20 bolts, nuts and washers along with a proper backing plate installed.

MAINTENANCE

This product is made with anodized aluminum. This creates a very hard protective seal on the surface of the aluminum to protect it as much as possible from pitting. When the anodized coating is broken and raw aluminum is exposed, corrosion will take place. Avoid damage from knives, gaffs or other abrasive impacts which can break the anodized coating as well as abrasive chemicals. **Always use a mild, non abrasive soap and lots of fresh water when cleaning any aluminum product on your boat (For more information on maintenance, visit TacoMarine.com to view Taco Marine's Aluminum & Stainless Steel Care & Maintenance Guide).**
