

GS-500 OUTRIGGER MOUNT

TACO Marine now offers a higher performance outrigger mount with their 400 and 500 series specifically designed for boat lengths surpassing 50' and quad engines exceeding 1600 horsepower. The center console market continues to grow and so does the size of its vessels and the engines that power them. The new GS-500's upgrade in strength easily handles the increasing outrigger pole lengths in both Aluminum and Carbon Fiber for up to 30'. Experience the difference with this new high performance series of outrigger mounts.

FEATURES & BENEFITS

- Increased surface area on the hard top plate
- Increased thickness of the hard top plates to 3/4" to reduce flex
- Larger top tube with extended bearing for additional arm support
- Extended upper casting to prevent tube buckling
- Double the amount of top assembly hardware
- Stainless lever grip for additional lifting strength
- Patent pending twist and lock mechanism for easy outrigger installation
- Eight bolt pattern attachment for increased arm and pole support
- Increased thickness in the backing plate to 1/2"
- Uses same bolt pattern for installation as current Grand Slam series
- All cast Aluminum upper tube
- 30% Larger casting than the TACO Marine GS-380 Outrigger Mount
- Black hardened anodized aluminum butt section with lock/unlock indicator to secure Carbon Fiber outrigger poles
- Added gusset support for long distance high speed runs
- Additional 15° rotator handle adjustable position
- Waterproof sealed design
- Larger ergonomic crank handle assembly for vertical movement with new locking positions both open and closed
- Easy disassembly for powder coating
- Adaptable head to make XL version for large center console with hard tops over 2-1/2"
