

MARINE FABRICATION

Pipe & Tube

Schedule 40 Aluminum Pipe

TACO's aluminum pipe is used for construction of T-tops, Tuna Towers, Leaning Posts, Poling Platforms, Bow Rails and other marine metal structures. The unique properties of the pipe allows the fabricators to achieve desired bends and welding while maintaining strength, stability, and quality appearance.

- Premium anodized aluminum marine grade stainless steel
- Ideal for interior and exterior use
- Extruded to close tolerances
- For use in T-tops, towers, leaning posts, poling platforms and bow rails
