

INTELLI-HINGE

Intelli-Hinge permits hinging concave surfaces

Conventional hinge unable to perform

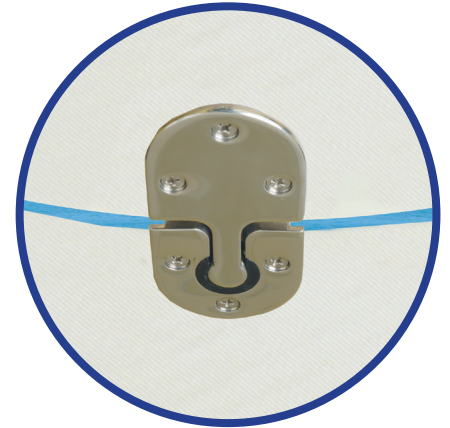

Taco Marine introduces the Intelli-Hinge (H90-0400) a patented hinge that offers manufacturers unprecedented design flexibility.

The design features an integrated ball-and-socket pivot point permitting pivoting on concave, convex and multiple plane surfaces. This design offers the ability to hinge from any two sides, unlike conventional hinges limited by a fixed axis.

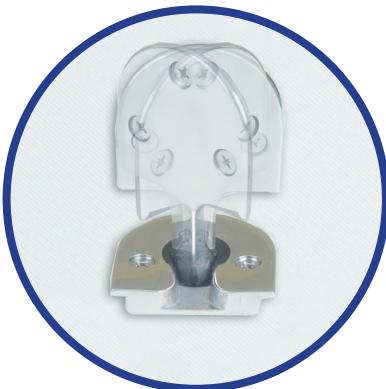

The Intelli-Hinge meets any requirements for unique applications such as curved hatches, seats, anchor lockers, transom doors, engine compartments, under seat storage and ski lockers. In specific applications, the hinge also has removable features. Additionally, the design is self lubricating, preventing corrosion and galling, and eliminates "rattling".

The Intelli-Hinge is made of corrosion-resistant marine grade stainless steel, it features low profile, European styling sure to enhance any boat.

Installed Intelli-Hinge H90-0400

Patent #7,921,513

Intelli-Hinge rotation capabilities

Intelli-Hinge multi-axis operation
