Selection Guide

FIND THE PERFECT PROFILE

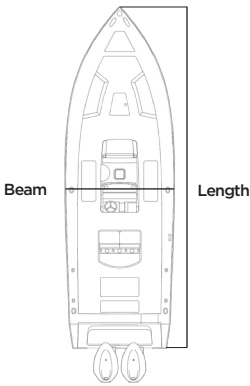

Manufacturing the highest-quality
Rub Rail and marine products since 1959.

BEFORE YOU BEGIN

The TACO Marine Rub Rail Replacement Guide cross-references the original factory Rub Rail used by leading boat manufacturers since 2008. Follow these steps to find the Rub Rail that you need:

1. Look up the make of your boat.
2. Match the Rub Rail and Insert (if applicable) to your existing rail (all profiles are to scale).
3. Choose your preferred color.
4. Call a distributor or retailer to verify availability of the suggested Rub Rail, or shop online at tacomarine.com/buytacodirect.
5. Place order and get confirmation.

ESTIMATING RUB RAIL LENGTH

1. Take the length and width (beam) of your boat.
2. Multiply length by two and add beam.
3. This total gives you the MINIMUM length of Rub Rail required for your boat in feet.

ORIGINAL & COMPATIBLE

TACO Marine supplies the original Rub Rail to most of the builders listed in this guide. Compatible Rub Rails are provided for those boats where the builder has more than one supplier or uses a competitor's product. In most cases, the product is virtually identical and interchangeable for all practical purposes. However, on older boats, the original Rub Rail may not be the current one installed.

Handy Tips

- Ensure the length of the Rub Rail is sufficient for your boat. It is always best to buy an extra 10' for trial and error.
- Make sure to purchase all the materials needed (Rub Rail, Insert [if applicable], stainless-steel fasteners, end caps, splice caps, etc.) to complete the job.
- Carefully read all the instructions before beginning and/or watch the TACO Marine Rub Rail Installation videos available on our YouTube channel youtube.com/tacomarine and our Website tacomarine.com.
- You can replace your Rub Rail with a factory replacement style or completely different look. Regardless of the material originally installed by the builder of your boat, feel free to choose the material and style you desire.

- If you can't find the exact Rub Rail profile for your boat, we offer several universal Rub Rail kits that may work. Discover more on our website tacomarine.com.
- It is easier to install if you remember to choose a Rub Rail that is at least the same height as the original.
- Flexible vinyl Rub Rail is the easiest to bend and provides a cushioning effect when in use against normal bumps from piling and docks.
- Rigid vinyl Rub Rail, as well as aluminum Rub Rail with a flexible vinyl insert, perform well, lasts long and is easy to install in straight runs.
- Rigid vinyl Rub Rail with a stainless-steel overlap or insert provides the best protection and the longest useful life.
- SuproFlex Rub Rail is easy to install, extremely flexible and requires little-to-no heating.

Ideal Chafe Protection

TACO Marine's hollow back and solid back stainless-steel overlays and inserts have other applications. They can be used as **chafe protection** for your boat with or without use of any extruded rub rail. They can also be a nice addition to any current flat face rub rail to provide a clean and updated look to your boat.
